What Do We Need From You?

- Scheduled contract let date Dec. 2025. What if this changes?
- Next steps (who/what/when/where/why/how)?
 - What are your questions about the design and construction schedule ideas?
 - What information do you need to make operational decisions? And when?
 - What operations are you willing to do differently? And when?
 - What do you have planned (or considering) in the next few years?
 - How do we engage your operation?

Are We Still Talking About This?

- **1999 to 2012** – Planning, Design, Environmental approval, but no money
- **Feb. 2017 to Sept. 2017** – Phase 1 public engagement
 - 48 meetings; 4,100 completed surveys with comments
 - Design; Construction schedule; Community effects; Mobility during construction
- **Sept. 2017 to present** – Analysis of Solutions
 - Examined Phase 1 public input
 - Strengthened goals and vision
 - Design and construction schedule options
- **Nov. 2022** – Brazos County voters approve bond with \$15M for BWX
- **Feb 2023** – TTC provides additional funding for BWX; scheduled for FY 2026

Below-Ground Concept for Bush-Wellborn Intersection

How Will We Build It?

DRAFT: Design not final
These are only ideas.
Some of these may not be possible.

- With any construction approach, the following will happen:
 - Project will be different than 2818
 - FM 2818 will be completed
 - Stay on schedule – Milestones; UP Railroad coordination; Move utilities; Cost plus time bid process; Incentive payments and disincentive charges
 - Extensive communication throughout the project
- Construction schedule ideas
 - Eliminate most schedule risk
 - Considering big city construction methods
 - Start work not affecting the flow of traffic

When Everyone Has To Go Somewhere Else

Here are some crazy ideas – none of these have been vetted:

- Minimize amount of time traffic flow is affected
- Adjust traffic signals and road configurations
 - DDI, FM 2818, Holleman/Wellborn intersection, widen Penberthy on campus
- Reduce vehicle travel across the railroad
- Change bus routes
- Change schedules and/or locations
- Change parking lot designations and choices
- Check travel options – try a new route or mode
- Mobility coordinator - help travelers understand options
- Engage the community – from now through construction
- Anything else?

When Everyone Has To Go Somewhere Else
