Item No. 7.13.

Rejection of ITB 24-068 Stonebridge Drive and Scarborough Drive Roundabout.

Sponsor: Emily Fisher, Director of Public Works

Reviewed By CBC: City Council

Agenda Caption: Presentation, discussion, and possible action on the rejection of the received proposals and cancelation of ITB 24-068 for construction of the Stonebridge Drive and Scarborough Drive roundabout.

Relationship to Strategic Goals:

1. Core Services and Infrastructure
2. Neighborhood Integrity
3. Improving Mobility

Recommendation(s): Staff recommends rejection of ITB 24-068.

Summary: In 2021, the residents of the Stonebridge neighborhood in Woodcreek applied for the Traffic Calming Program and were approved as part of the FY 2022 cycle. The working group agreed on a roundabout at the intersection of Stonebridge Drive and Scarborough Drive as the preferred traffic calming method and the neighborhood voted in favor of the project 16-8. Design and bidding for the roundabout commenced. However, residents voiced concern regarding construction of the roundabout after bids were opened. The increase in traffic anticipated from development in the area did not materialize and residents felt there was not a need for the roundabout at this time. After corresponding with the working group, another neighborhood vote was taken and the project was struck down 30-0. Since bids have already opened, the Council will need to reject all bids to formally withdraw the project. The neighborhood will not be eligible for the traffic calming program for five (5) years. Staff is currently drafting changes to the Traffic Calming Policy to better define this process and will bring these revisions to the Council for adoption at a later date.

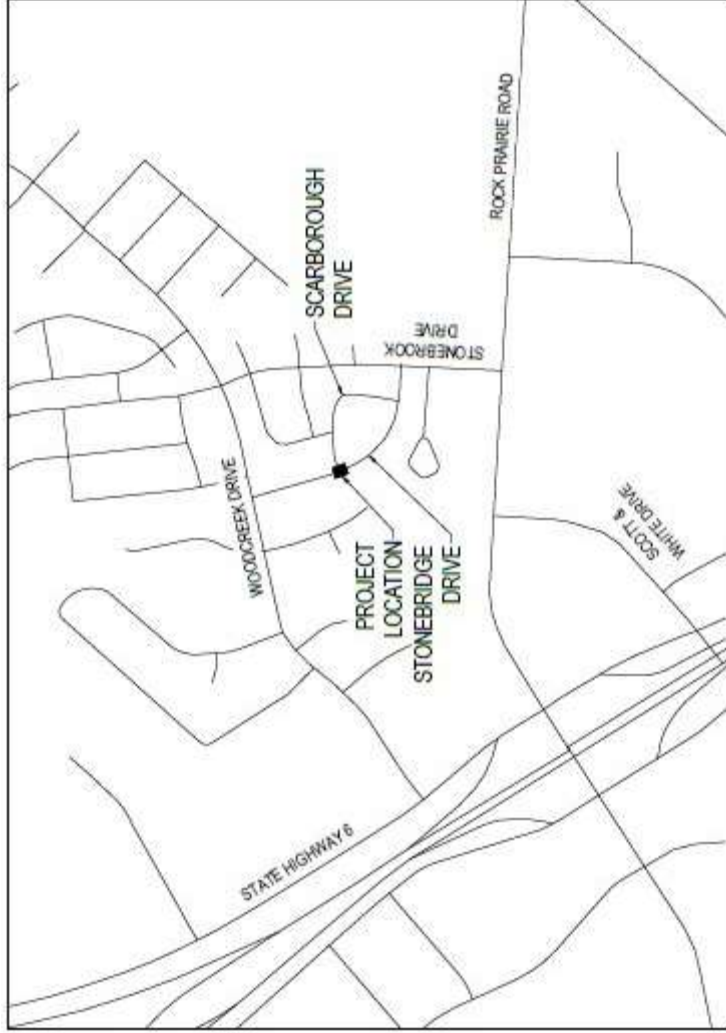

Budget & Financial Summary: Funds for the traffic calming program are available in the Traffic Engineering operations budget and will no longer be needed for this project. The funds will be allocated to traffic calming projects currently under design.
