DOLLAR AMOUNT: \$756,096.90

The evaluation committee is requesting the award of this project to Brazos Paving, Inc as the highest evaluated vendor. Dilly Shaw Tap Road Reconstruction is a full-depth reconstruction of approximately 2,575 linear feet of Dilly Shaw Tap Road, beginning at the intersection of FM-974/Tabor Road and extending southeast in Precinct 2.

NOTES/EXCEPTIONS: The reconstruction is necessary to significant deterioration of the existing gravel pavement caused by age, weather, and heavy traffic, which has compromised the roadway's safety and performance. The project will include pavement reconstruction, drainage improvements, stabilization of the reclaimed paving section, grading, installation of a culvert at the TxDOT intersection, driveway reconstruction with new culverts and safety end treatments, and the installation of roadway signage and pavement markings. These improvements are critical to enhance roadway safety, improve drainage, and ensure the long-term durability and serviceability of this important county road.
